## Monetary Reform.

"Until the control of the issue of currency and credit is restored to government all talk of the sovereignty of Parliament is idle and futile."—(Rt. Hon. W. L. Mackenzie King).

The first step in regaining control is the creation of a nationally owned and controlled central bank. Behind the bank would be the entire assets of the nation. All Dominion, Provincial and Municipal financing would be carried by the bank at cost.

All currency would be issued by the central bank and would go into circulation through public works or through the commercial banks which would borrow it on proper security. This, coupled with the power to fix interest rates, would enable the central bank to see that credit is provided to the people at reasonable rates on reasonable security.

The bank, by controlling the amount of currency in circulation, can control internal price levels. Also all stocks and bonds would have to be authorized by the bank, to prevent the sale of worthless or watered stock.

This is only a brief outline of Monetary Reform. Mr. Bryan will go further into the matter in his meeting at Kelly's Hall on Saturday, August 10th, at 8.30 p.m.

## Note Liberal!

and see that Alberta stands with the other eight provinces for Monetary Reform.

## Weighing the Bull.

Main street's gentlemen of leisure and others were treated, on Friday noon, to the sight of a bull wrestle a-la-Stony. The argument started when a local butcher bet a former his celebrated bull didn't weigh 1200 pounds, as the bull's owner claimed—the butcher having an idea the animal weighed close to ten hundred. Taking the bull down to the scales wasn't a one-man job, but one man tried it—making the trip on a "sliding" scale, and losing the perfectly good seat of his plus-fours on the way. When two friends of the cattleman came to his assistance the bull was got under control, but only after Mr. Bull had made a spectacular resistance, reminding Mr. Works of the years he'd spent in Old Mexico. The owner was in no jocular mood, however, as, besides the loss just mentioned, he had to part with the \$5 he had lost on the bet with the butcher.

## The Schuetzenfest.

The bi-monthly shoot by the Rifle Club members, held under the Dominion Association's regulations, are over for this season, the concluding shoot being held last week, and those entitled there to received their medals. Mr. Otto Hoffman now sports three of these medals. Otto made a very remarkable record at last week's shoot, he scoring 25 consecutive bullseyes. These were made while shooting off a tie with a fellow-member. About 30 were present at the shoot last week, including some of the good marksmen from the City.

## Free Show and Dance.

To celebrate the opening of their new garage, Barth & Anderson are staging a free picture show on the premises on the evening of Friday, Aug. 9. There will be an interesting movie picture and several comics. The show will be followed by a dance, free to everybody. Barth's orchestra will be there. There should be a good attendance at this, the first free dance in Stony, over a considerable period.

## Aberhart Coming to Edmonton August 12.

Wm. Aberhart, B.A., of Calgary, leader of the Social Credit movement in Alberta, plans to take part in the Provincial election campaign in Edmonton during the week of August 12. Mr. Aberhart has been spending his holidays at the Coast.

## Dr. Brown on Holidays.

Dr. Brown, Dentist, who makes regular Friday trips to Stony Plain, will not be here on the Fridays of Aug. 9, 16 and 23d. He will be here again on Friday, Aug. 30, to attend the wants of his patients.

## In the Morning Only.

Mr. Bryan wishes us to state that, from now until the date of the Provincial election on August 22d he will be in his office only until noon of each day.

## HOW TO MAKE ICED TEA

Infuse six heaping teaspoons of Salada Black Tea in a pint of fresh boiling water. After six minutes strain liquid into two-quart container. While hot, add 1 1/2 cups of granulated sugar and the juice of 2 lemons. Stir well until sugar is dissolved; fill container with cold water. Do not allow tea to cool before adding the cold water; otherwise liquid will become cloudy. Serve with chilled ice.

# "SALADA" ICED TEA

## Whither?

Like many other Canadian citizens the writer listened to Hon. Macdonnell King's first radio broadcast a few nights ago. Just as he has listened to the radio addresses of Premier Bennett and other political leaders in which their respective party programmes and public issues of the day were discussed. In his address Mr. King gave emphasis to a word—Whither. He, of course, applied it to the political trends of the day and asked the Canadian electorate to give serious thought to "whither" the various policies now being urged upon them for acceptance were leading.

It is not the intention of the writer to follow Mr. King in giving to this word a political application. Party politics are as much subjects for discussion in this column. But as we listened to Mr. King and his use of this word, the thought was forced upon us: Do we as individuals ask ourselves, as we should, whither we are headed in many of the undertakings upon which we embark? Or do we lightly engage in them without sufficient consideration, and without any very clear idea fixed in our minds as to what we hope to achieve?

A sailor as he leaves his home port knows whither he is bound. He is headed for a definite port, and he equips himself with chart and compass to guide him to such port by the most direct route. He knows why he is headed to such particular port. An explorer does not lightly enter into the trackless forest or well-nigh impassable jungle without knowing whither he is bound, and the mining prospector likewise knows whither he is bound and the objective he hopes to achieve.

But how many of us as we pursued our way through public school, and possibly through high school and even college and university had a definitely defined goal before us which it was our ambition and determination to reach? Did we, as we devoted years to study, know whither we were bound, or did we proceed unthinkingly with our school studies with no very fixed idea in mind as to the vocation in life we proposed to follow?

And as we possibly just drifted into some kind of a job, or were apparently forced into some position or occupation seemingly by environment or force of circumstances, did we even then asked ourselves, whither am I going? Is this the kind of work for which I am best fitted? Or am I just allowing myself to drift without any particular effort on my part to direct my life into proper channels? In a word, did we take the trouble to provide ourselves with a chart and compass to guide us to our true destination?

Furthermore, having found our lot cast in a particular field of endeavor, and possibly feeling fairly content therein, did we even then query ourselves—whither? That is, did we merely accept our work as a means of livelihood, and nothing else? Or did we, do we now, regard our work as something more, something finer, than a means of sustenance? Whither are we headed? To render real service to mankind and to our country, to make the world a better and happier place because we are in it, or are we simply content to walk the treadmill of life as we find it?

As citizens do we ever take time to pause and consider whither the community in which we live is headed, whither our churches are taking us, whither our schools and colleges are educating our children? What are the moral trends of the times? Are they in the direction of developing stronger characters than those of bygone generations, or is the reverse true? In our own little community growing better, or worse; is it being beautified or is it retrograding?

Nothing in Nature stands still. If it has life it is moving, either forward or backward. Nature abhors a vacuum. Mankind is the chief of all the works of Nature, and he must progress or slip backward. Each individual, if he or she is wise, will stop and ask—whither am I going? The person tempted to a dishonest or criminal act should pause and consider, whither? What is the end of the road upon which I propose to travel?

And what is true of the individual, is true of the nation. All nations and all peoples may well ask themselves at this time of predictions of war, or warfare preparations in all parts of the world, of uncompromising attitudes of nations in international conferences, whither are we drifting? What will be the outcome, the end, of another war? The Great War was a source of loss to the whole world, to the victors as well as to the vanquished, and to those who remained neutral. Each and all suffered. It will be so again. Is that what we want, as nations, as individuals? Is it not time we stopped and gave consideration, the most serious consideration of our lives, to that old English word—whither?

Let the reader apply this word to his own actions, his life activities, his next decision. Try and probe the future a bit; seek to visualize the outcome of any move you are about to make. Do not go blindly and thoughtlessly ahead. Ask yourself in all seriousness—whither?

## Crowds Worship Signs

Crowds of superstitious persons have each night been worshipping before a mysterious red glow in the window of a school in the French concession at Shanghai. They believed it to be the appearance of a certain Chinese deity. Then the red glow was found to be merely the reflections of an illuminated sign over a theatre across the street.

## Ban Was Strict

The word "tabu" is an Hawaiian contribution to the list of American folk words, says a bulletin from the Pan-Pacific Press Bureau. Ancient Polynesians had many tabus, typical among which were those forbidding women to eat in the presence of men, or in the same house, or even to cook their food under the same roof.

## Slow-Motion Camera

## Photographs Lightning

## Same Electricity In Bolt As In Ordinary Light Bulb

Slow motion cameras have been used by science editors of The Country Home, New York, to measure thunderbolts and estimate just how much electricity is released in a flash of lightning.

Considering all the noise a thunderstorm can make, it is a little disconcerting to discover that the average thundercloud has a store of only just about as much electricity as flows through an ordinary electric light bulb in a minute. It generates this much electricity in five minutes, maintains it at this value for a longer or shorter period, and then lets it fly as a lightning flash at a pressure of about five billion volts, enough to blow a man down, or a horse, or even a small house. The pressure makes the discharge both spectacular and dangerous, and the thundercloud machine is continuously generating electricity at this pressure, a single cloud often developing three million kilowatts of power.

Photographs indicate that when a cloud is ready to hurl a thunderbolt it first comes out a tiny tongue of flame. This stretches earthward about 50 yards from the cloud. It pauses and then wades out for a 10,000th of a second. It then reappears and stretches another 50 yards. This process continues until the ground is reached. Branch tongues often spring out from it. The instant the leading tongue lashes the earth, the main part of the stroke begins. A brilliant flame sweeps upward from the ground toward the cloud, retracing the path literally blazed by the leader. This second stroke is much quicker lasting but 50 millionths of a second.

## Toast King In Silence

## Irish Freemasons Find It Best Way To Avoid Trouble

Irish Freemasons have adopted the suggestion of Patrick Rutledge, minister of justice, that "God Save the King" should not be sung at future dinners.

During a dinner of the Cork lodge a band of men rushed into the lodge, overturned the tables and fired revolver shots, using blank cartridges. It was believed that this outrage was committed because the guests exhibited too much fervor in singing "God Save the King."

Following this episode, Rutledge offered to provide protection for Masonic lodges on the occasion of annual dinners but he was assured this was not considered necessary. He then suggested that "God Save the King" could be omitted in future. The suggestion was adopted but Masons will continue to toast His Majesty. The toast will be in silence, however, so that extremists can scarcely find grounds for breaches of the peace on its account.

## A New Burglar Trap

## Calgary Man Has Invented Gadget To Protect Banks

A burglar trap designed for use in banks has been invented by Adolf Johnson, of Calgary.

In his home he has built a working model of his invention. When a small button is stepped on, steel plates slip quickly into place over windows and revolving door sets blocking escape of robbers.

Johnson patented the contrivance in 1922 and has been working on it ever since with a view to adding new features. Among other inventions he has developed are semaphore signals for street intersections, a parachute plane without either landing gear or wings and a number of automatic gates.

Piron, the French author, was arrested and arraigned by a belittling magistrate. "You're a poet, eh?" the judge sneered. "I have a brother who is a poet."

"Then our families are even," Piron retorted, "for I have a brother who is a fool."

Oaks are more likely to be struck by lightning than any other tree, declares a London expert, who has reported that since 1932 not a birch, beech, holly or horse chestnut in England has been struck. 2110

## It's great to get back!

Here I am back again to Ogden's Fine Cut. Times are better and I can afford to pay the little it costs—and it's worth it. If you're wise you will get back to Ogden's, too.

"Roll 'em" in "Vogue" or "Chanticleer" papers for full satisfaction.

## SIMPLE SMART DRESS LIKE THIS YOU'LL FIND ENOUGH USE FOR

By Ellen Worth

It's the new shirtwaist dress with demurely feminine air, the type that may be worn by women of all ages. Inverted plaits at the front of the skirt give room for a comfortable stride. The pointed yoke at the back, has a stunning tendency.

Necktie printed silk made the model tempting. Wear it for town or for resort. Checked silk gingham in 'maise and white, with short sleeves as in back view, is dashing for sports.

Style No. 321 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust. Size 16 requires 3 1/2 yards of 39-inch material with 1/4 yard of 35-inch contrasting.

Patterns 15c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 170 McDermott Ave. E., Winnipeg.

Summer Fashion Book contains many more smart cool vacation clothes. Send for your copy to-day, the price is 15 cents.

## For Economy's Sake

Breakfast in bed may be only for wealthy Occidentals, but in Japan it is an economy measure, reports Miss Frances B. Clapp, Congregational missionary, just back from Kyoto, Japan. Fuel shortages makes it cost about 30 cents to build a fire, so many Japanese eat breakfast in bed to keep warm, said Miss Clapp.

In Turkestan a form of grass has been discovered that when uprooted by storms it falls downward and replants itself.

## Becomes Separate Grade

## Recompense For Garnet Wheat Holders If Loss Results

Effective Aug. 1, Garnet wheat will be marketed as a separate grade, E. B. Ramsay, chairman of the board of grain commissioners, announced. Its price, he said, will be determined by ordinary market conditions.

The wheat will be marketed through existing channels, stated Mr. Ramsay. He looked upon the change as a routine matter, which should produce no undue difficulties.

At the last session of parliament, \$1,500,000 was voted to recompense Garnet wheat holders while the new method of marketing was being evolved, if any loss resulted. Previously, Garnet wheat had been graded with No. 2 Northern.

The new grade will be separated into two varieties, No. 1 Garnet and No. 2 Garnet. Any Garnet wheat not good enough to be graded No. 2, will be put into No. 3 Northern or lower grades. The price of the new grade will be fixed in the open market, similar to the present method in force in other grades.

## STOPS ITCHING In One Minute

D. D. D. Prescription Speeds Relief

For quick relief from the itching of pimples, mosquito or other insect bites, eczema, rashes and other skin eruptions, apply Dr. D.D.D. Prescription. Forty years' world-wide success. Penetrates the skin, soothing and healing the inflamed tissues. No fuss—no muss. Clear, greaseless and stainless—dries up almost immediately. Try D. D. D. Prescription. Stop the most maddening itching instantly. A 30-cent bottle, at any drug store, is guaranteed to prove it—or money back. D. D. D. is made by the owners of ITALIA LILAS.

## Relic Of Riel Rebellion

## Old Ox-Yoke Presented To Museum In Regina

On exhibition to an ox-yoke made in 1852 by the late George Cross of Inchkeith, Sask., and later used in the Riel rebellion in 1885.

It is made from oak and some idea of its durability was learned when it was found that for over 40 years it has lain outside in all kinds of weather and is yet in a good state of preservation. It is being presented by Mrs. Cross to the museum at Regina as a souvenir of early days in Saskatchewan.

Antonio Stradivari, famous violin maker, died almost 200 years ago, but the quality of the varnish used on his violins has never been equaled.

## BABY'S OWN SOAP

Best—You Baby's

## Plant Breeding Program In Canada Carried On For The Past Fifty Years

Fifty years ago failure to find a variety of wheat suited to Canadian conditions led to the introduction of a program of plant breeding which has been carried on unceasingly ever since with results that have made Canadian grown wheat famous throughout the world. Another important field crop which is receiving the attention of plant breeders is oats. The oat crop ranks second in total value among all field crops in Canada and makes up about 30 per cent of the total cereal crop production. With a crop of such national importance, which is being grown under widely different conditions of soil and climate, there are naturally many problems which demand the attention of the oat breeder in his efforts to assist in maintaining a high standard of production and quality.

The Dominion Department of Agriculture, through the Experimental Farms System and the Dominion Rust Laboratory, Winnipeg, has been for many years endeavouring to breed varieties resistant to such diseases as stem rust, crown rust and the smut. The oat improvement program includes the development of early, high yielding, disease resistant varieties suited to the various districts of the country, the development of stronger strawed varieties, improvement in the quality and yield of the standard oats and the description and classification of varieties. A collection of more than 500 varieties of oats has been introduced from foreign countries throughout the world, and is being studied with the hope of finding some that may be adapted to Canadian conditions or may possess certain qualities that would make them useful for breeding purposes.

### Division Fairly Even

Premiers Affiliated With Catholics, Presbyterian, and United Churches

Of Canada's one prime minister and nine premiers, four are Roman Catholic, four United Church and two Presbyterians.

The four premiers in the east are Catholics; the prime minister and three premiers in the centre and middle west are United Church; and the two far western premiers are Presbyterians.

Premier Macdonald of Nova Scotia, Dymally of New Brunswick, Macmillan of Prince Edward Island, and Taschereau of Quebec are Roman Catholics.

Prime Minister Bennett of Canada, and Premiers Hepburn of Ontario, Bracken of Manitoba, and Gardiner of Saskatchewan are United Church.

Premiers Reid of Alberta and Pattullo of British Columbia are Presbyterians.

L. P. D. Tilley, whose government has just been defeated at the polls in New Brunswick, is an Anglican.—Windsor Star.

### People Using More Sugar

Annual Average Consumption For Four Years Is Higher

The world's sweet tooth is evidently growing bigger, says a bulletin from the Canadian National Statistics in which the department reports that the annual average consumption of sugar for the four years, 1931-34 inclusive, was 26,361,000 tons, an increase of 3.36 per cent over the five-year period 1929-1930. Cuba has dropped considerably over the world supply of sugar, her production at present standing at 9 per cent, whereas in 1930 it was 21 per cent. The British West Indies is also an important source for sugar, much of that reaching Canada coming in vessels of the Canadian National Steamship fleet, the direct Canada-British West Indies service.

### Wheat Graded High

The grading of Manitoba wheat was so high last year that only four per cent of the entire crop was retained as feed for livestock and poultry—3,200,000 bushels out of a total of 37,100,000 bushels.

## A Paying Industry

Canada's Commercial Food Industry Is Growing Rapidly

The commercial feed business in Canada is growing rapidly. It has become firmly rooted and is here to stay. It has possibilities for wonderful development within the domestic field, says the June issue of the Canadian Society of Technical Agriculture Review, and is capable of becoming one of the most potent factors in the development of the Canadian poultry and livestock industries. All commercial feed feeds in Canada are subject to the regulations of the Feeding Stuffs Act which is administered by the Feed Branch of the Dominion Department of Agriculture, and each year every feed manufacturer must register with the Department and submit to its inspectors analyses of all mixed feeds. Also, a list of the ingredients and of the guaranteed chemical analysis of each feed as to protein, fat, and fibre must be plainly printed on the bags or containers used, or on a suitable tag securely attached thereto. In conjunction with the official registration is the regular systematic inspection of all mixed feeds by the Feed Branch in order to make sure that the manufactured products conform to the registered guarantee as to composition and chemical analysis. This inspection constitutes an additional protection to the users of commercial feeds. The present registrations include 71 ingredients which may be classed as grain products and 74 which are non-grain products, but the actual number in general use does not exceed 35 or 40.

## Covered Smut Of Wheat

Brandon Experimental Farm Note Tells How To Detect It

Covered smut or hunt of wheat is usually not recognized on the farm until it is found in the threshed grain. This is because the smut spores in the standing grain are completely covered by the seed coat so that infected heads appear normal unless they are closely examined. During the time wheat is in head, but before it is ripe, the normal heads are yellowish green. If plants infected with covered smut are present, they are usually shorter than the others and the heads are a dark bluish green. When the wheat is in the dough stage, the kernels containing smut spores are usually plumper than the others and cause the plumpness of the wheat head to be spread widely apart, so that the dark bluish green kernels are exposed. When such kernels are pinched with the thumb nail, they break easily, exposing the black, oily spores. In the threshed grain the disease is easily recognized by the presence of black nut balls, by the presence of spores on the brush of normal seeds, and often by the offensive smell of the spores. This disease is controlled by the use of resistant varieties or by seed treatment.

## Kind To Photographers

Prince of Wales Is Popular With Camera Men

Newspaper photographers tell a good story about the Prince of Wales, who is popular with the camera men. Once, when the Prince was staying with a distinguished Bostonian, policemen surrounded the house and grounds. No one was allowed near. But the cameramen came as close to the hedge as possible.

The Prince was returning from a ride through the grounds, when he spotted the photographers. They were frantically trying to get pictures of him from the distance. Not wishing to offend his host by inviting the cameramen to come in, the Prince rode over to the hedge. Then he posed for pictures. Not until he asked and was assured that the photographers were satisfied, did he ride away.

News photographers usually find that the more important a man is, the easier he is to get to pose. It will be recalled that the present Prime Minister Baldwin of Great Britain made a big hit with photographers during the Imperial Conference at Ottawa by his readiness to respond to requests for a picture.

## Cushions For Fragile Freight

New Spring System Designed To Out Last In Transit

Fragile freight in the future will ride on special cushions both within and outside the car, according to reports at the quarterly Eastern Claims Conference in Atlantic City. Progress was revealed in developing a new system of springs between the boxcar and the wheels, and check or "snub" the constant up and down bouncing of the rail joints under the train.

Tests were made with recording instruments over millions of miles of freight car travel to determine the amount of vibration, and it was found to be large. Research engineers drew upon the experience of automobile designers in evolving the new spring system, delegates said.

Another development reported was a special cushion arrangement to be used when glassware is shipped by freight. Such products amount to millions of dollars a year in value of shipments and breakage losses become serious, the freight claim agents admitted.

An egg is supposed to be at its best when about 12 hours old. If you wish to preserve eggs for any length of time cover them with fat, wax, lard, or oil, or pack them in sawdust or eggs. Eggs should be kept in a cool, dry place.

310

## Red And Black Rust Are Different Stages In Life Of The Same Organism

### Identification Important

Pure Bred Pigs Cannot Be Exported To U.S. Without Tag

From information received by the livestock branch, Dominion department of agriculture, the importance to swine breeders of the new regulations recently enacted under the Pedigree Act, whereby all pigs born in Canada since Jan. 1, 1934, must be identified either by tattoo marking or by ear tags before the pigs are eight weeks old, and before weaning, is not being fully appreciated.

The new system requires that if a breeder decides to tattoo his pigs, the identifying letters shall be allotted by the Canadian livestock records, Ottawa, and if he favors the use of tags then these must be ordered through the same organization. Not until the proper identification of the pigs has been made will the official registration be recorded. Moreover, the export of pure-bred pigs to the United States cannot be made without this identification. This system, if properly followed, provides a distinct and positive identification for every registered pig in Canada. The advantage to the purchaser is that a definite link is established with the pedigree certificates of the pigs.

With the keen demand at present for pure-bred pigs, compliance with this new method of identification makes it possible to sell pure-bred swine as registered stock without difficulty.

"It is impossible to change human nature but possible to change human behavior."

Emerson said there is a solution for every problem.

What is the difference between "red rust" and "black rust" of grain? Dr. J. H. Craigie, officer in charge, Dominion Rust Research Laboratory, Winnipeg, supplies the answer in the following statement:

"There is considerable confusion in the public mind regarding the relation of 'red rust' to 'black rust' of grain. Many people regard them as two distinct rusts. As a matter of fact, they are merely two different expressions of one and the same disease. The disease first appears on the plant as 'red rust' (that is in the red stage) and this stage continues while the crop remains green. When the crop begins to ripen, the red stage gives place to the black stage, the so-called 'black rust'. A far better name for the disease is 'stem rust' as it is the stems of the plants that are mainly affected, although infections also occur on the leaves.

"It is while the disease is in the red stage that it spreads. The red color is due to the reddish spores produced by the organism. They are distributed by winds and cause new infections.

"In the black stage, the spores are dark in color. These spores remain attached to the plants and are not carried about by winds, at least to any extent. In fact, the black spores are incapable of infecting cereal plants. (The role they play in the life history of the organism need not be gone into here.)

"One point more should be noted.

It is generally stated that the 'red rust' doesn't do much harm to the crop, but that the damage is done by the 'black rust'. This is altogether a misconception. As pointed out above, the red rust and the 'black rust' are different stages in the life of one organism—the fungus that causes stem rust. From the time the red stage appears on the plants and right along until after the black stage appears, the plants are being drained of food and water by the organism. It is therefore wholly incorrect to say that 'black rust' alone does the damage. Both the red stage and the black stage are responsible for the sum total of damage done to the crop, but most of the damage is probably done before the black stage appears.

## Dates Back Many Centuries

Investigators Think Wine First Made About 7000 B.C.

Noah was not the first vine-grower. Far from it, according to Rene Dage, and Albert Armand, respectively French oenologist and wine expert, who after searching new light on the history of the grape in Egypt and elsewhere, have delivered their report.

Noah dated from somewhere between 3761 B.C. and 3100 B.C. But such was real or a myth between 1500 B.C. and 1000 B.C. But the Egyptians were making wine in 7000 B.C., the investigators show, while the cave-men of latter stone age days could have done it first if they knew how, and it is more than likely they did. Thus the first wine might have dated from 10000 B.C.

The investigators found that the earliest traces of the grape vine date to the cenozoic era. Fossil prints show them with the pointed leaves of the species known in French vineyards to-day as American vines.

There is none of the 7000 B.C. vineyard left except in dried form at the bottom of clay wine jars, and analysis of this dust has not produced any idea of its flavor. But something like 6000 B.C. was a good year the investigators conclude.

## Windy City Rules Airways

Already the world's greatest railroad terminal, Chicago has become the world's busiest commercial air centre. The municipal airport set a new mark when the addition of half a dozen schedules brought the total daily arrivals and departures of Chicago's seven airlines to an even 100 planes. Newark, N.J., is second with 86 flights daily; Cleveland is next with 82.

## The SNAPSHOT GUILD

Prove Your Angling Ability

Today's Snapshot Guild is directed to all wives, husbands, daughters and sons who follow the great outdoor sport of fishing. What has fishing to do with amateur photography? Just this. The Chicago Iszaak Walton League, according to news dispatches, has included in its curriculum, in the fishing school conducted in Wisconsin, a "course of truthfulness." War has been declared against the angler who persists in telling about the "big one" that got away. The law of the Iszaak Walton League of Chicago regarding this phase of the art of fishing is very brief and to the point. Here it is, "Get your fish, take his picture or keep quiet."

No one in particular is being accused of telling little white lies about the "whopper" that got away but Chicago's Iszaak Walton League law should be recognized throughout the world. The old adage about the cake might be revised to—"You can have your fish and eat it too!" for although the fish may end its days in frying pan or broiler, a picture of it will live forever.

There is one thing to remember in taking snapshots on fishing trips. Just as you use different kinds of bait for catching various species of fish, so you must vary your methods of taking snapshots under different lighting conditions.

Suppose, for instance, that you are deep sea fishing or out in the middle of a lake under the glare of a mid-day sun. The fish you are taking long-shopped for jerk on his line. If you have one of the average folding cameras it should be ready for ac-

tion with the diaphragm opening set at f11 and the shutter speed set at 1/100 of a second. This setting of the diaphragm and shutter will serve two purposes. First—you will have the proper exposure and second—at 1/100 of a second you will stop the action as your lucky angler friend pulls the fish out of the water and into the boat.

If you have a box type camera, use the second stop opening. In snapping the picture with this type of camera you will get the best results if you wait until the fish is safely in the boat and then snap the picture after the catch and when your subject is not in motion.

Let me caution you, however, against a common error. Don't forget to set your camera for distance if it is of the focusing type. If you have a fixed focus camera don't get closer to your subject than about eight feet unless you use a portrait attachment.

Now—suppose you are fishing on a river, a lake or a large stream under such conditions require a different technique. Under these conditions you need a camera with an f2.5 lens or faster. You had better forget about fast action pictures and confine your efforts to taking your subject when not in rapid motion.

If you have a box type camera you should open to the large stop and use the average folding camera open the diaphragm to f8 or f11 and set the shutter speed at 1/50 of a second. And remember—"Get your fish, take his picture or keep quiet."

JOHN VAN GUILDER

## SURVEY SHOWS RUST WILL HAVE SERIOUS EFFECT

Ottawa.—Rust had seriously reduced the yield of all bread wheats in Manitoba and the infection was spreading westward into Saskatchewan, stated a crop report released by the Dominion bureau of statistics. The drought area in Saskatchewan was also extending.

In the west, the report said, "July has again provided conditions that were fatal to the good crop prospects on the southern plains where the conditions in May and June were so promising." In addition to the rust, the drought area which had been limited to rather narrow belts along the Alberta-Saskatchewan boundary, was extending eastward. Harvesting of the main wheat crop would not be general in that area for two or three weeks "no prospect is very indefinite and unsatisfactory."

"Rust has so severely infected the 1,500,000 acres of bread wheat in Manitoba that only a very light yield of poor quality grain can be expected. The infection on the remaining 1,000,000 acres of Durum wheat remains slight. Coarse grains are also rusted."

"Rust and drought are causing serious reductions in Saskatchewan crop prospects and the weather of the next two or three weeks will have a very important bearing on the final yield. In large areas running through the centre of the province from north to south, crop conditions remain very promising."

"In Alberta, the southern and some central areas will harvest light crops, but good prospects persist over the remainder of the province. Winnipeg—Stem rust infection has extended in Manitoba and Saskatchewan, according to the third report by Dr. J. H. Craigie, officer in charge of the Dominion rust research laboratory."

In Manitoba, stem rust has affected wheat as far north as Riding Mountain National Park and in some cases has attained "severe epidemic proportions" in common wheats, the report said.

The western limit of infection in Saskatchewan seemed to be slightly west of a north-south line drawn from Saskatoon to Moose Jaw, with severe infection in the southeastern section. Some traces were found north of Prince Albert. No stem rust has been reported from Alberta.

## Garnet Wheat Price Set

Separate Grading Went Into Effect On August First

Winnipeg.—The approximate market value of Garnet wheat as a separate grade wheat was established July 31 by the cash closing committee of the Winnipeg Grain Exchange.

No. 1 Garnet was quoted at 79¢ cent, three cents a bushel under No. 2 Northern, and No. 2 Garnet at 77¢ cent, the same price as No. 3 Northern.

Previously, Garnet wheat has been graded with No. 2 Northern, but starting with the new crop year Aug. 1, it will be kept separate from the Northern wheats and graded separately into two grades. Any Garnet unit for the two species will be automatically grade No. 2 Northern or lower.

## South Africa Prosperous

Business Reaches Almost Boom Proportions States Trade Commissioner

Vancouver.—South Africans are enjoying a period of prosperity almost reaching the proportions of a boom while most of the world is suffering from depression, David Meyer, South African trade commissioner to Canada, said in addressing a service club.

He said millions of dollars of new wealth was created when the country went off the gold standard and in 1924 South Africa increased her purchases from Canada from \$5,700,000 to more than \$12,000,000 and became the second largest purchaser of goods from Great Britain.

## Ready To Retaliate

Scottish Co-Operative Secretary Warns Against Wheat Board Hindering Trade

Calgary.—If the new Canadian wheat board places any impediment in the way of trade, the Scottish Co-Operative Wholesale Society of Glasgow will retaliate by diverting its wheat purchases into other channels. J. McCormick, member of the society's party touring Canada, said here.

Mr. McCormick, making a survey of Canadian political and economic problems with regard to their effect upon Scottish-Canadian trade, stated the society imported 3,000,000 bushels of Canadian wheat a year. He added the society owns the largest flour mills in Scotland and made the best and cheapest bread in that country using 90 per cent. Canadian hard wheat.

He was not impressed with the Ottawa agreements, Mr. McCormick continued and Scottish trade had benefited little from them. Free trade was the only proper method of dealing with international exchange of goods.

Chief accountant of the society, he is accompanied by Cameron Thompson and C. Hewitt, directors.

## To Guard British Legation

Sikhs From India May Be Sent Into Ethiopia

London.—Preparations are being made to send detachments of Sikhs from India to Ethiopia if reports from the British legation in Addis Ababa indicate they will be necessary to protect the legation building. It was learned here. Britain is also ready to evacuate British missionaries and their families now in Ethiopia. All the missionaries have been instructed to keep in close touch with the British legation.

It was revealed in the House of Commons no embargo has been placed on the export to Ethiopia of raw materials which could be used for the manufacture of munitions. Great Britain has granted Italy \$5 million to send planes over British territory in East Africa, the house was told. Twenty of these were for British Somaliland, and the others for the Sudan.

## Cheer King And Queen

Canadian Teachers In London Pay Visit To Palace Grounds

The serene atmosphere of the grounds of Buckingham Palace was shattered by three ringing cheers for the King and Queen from a party of 220 Canadian school teachers and school children, visiting England under auspices of the Overseas Education League.

The party was in the grounds when the royal car approached from an inner quadrangle, carrying their Majesties to Victoria station en route to the Cowes regatta. The King stopped the car and with the Queen chatted with Major and Mrs. F. Noy, in charge of the party, and some of the visitors.

## Designs New Coin

Washington.—Borrowing his motif from the dough-nut, President Roosevelt has designed a coin which soon may be jangling in American pockets. It is a half-cent piece, and treasury secretary Henry Morgenthau said it had a hole in the centre. The president also sketched a one mill coin, which unlike all other United States metal money, is square.

## Lands In Wheat Exports

Ottawa.—Canada was first in exports of wheat to the United Kingdom market during the first six months of 1935, according to a statement issued by the Dominion bureau of statistics. The Dominion was also first in oats, wheat flour, lobsters, copper ore, copper rods, crude oil, non-ferrous metals, patent leather, and rubber manufacture.

## Counterfeit Coppers

Vancouver.—Counterfeit one cent pieces are the latest in bogus money to appear in this city. The coins are expert imitations and have only one defect. They are made from copper but one-half the thickness of the government issue.

## NEW SENATOR

Veteran parliamentarian Colonel Thomas Canby, who has been a member of the House of Commons for many years, was one of the new appointments to the Canadian Senate.

## Start Aerial Survey

Dr. Charles Cannell Leads Party In Northern Trip

Prince Rupert, B.C.—A 10,000-mile aerial survey of northern Canada began July 30 when a party led by Dr. Charles Cannell, deputy minister of mines for Canada, hopped off at 2 p.m. for Wrangell, Alaska, in a seaplane piloted by C. H. "Punch" Dickins.

A. D. McLean, superintendent of Canadian Airways, and W. H. Sutherland, photographer, are other members of the party.

Dr. Cannell plans to take aerial photographs of 30,000 square miles of unmapped territory in the south-eastern Yukon, north of the Liard river. Geographers believe the Rocky Mountains come to an end in that vicinity and the Mackenzie ranges, which lie to the east, may be a separate mountain system.

The "tropical" valleys of Indian legend lie in the region to be explored. If possible, the party will land and investigate these valleys.

The survey will be concluded about August 15 at Edmonton.

## Bear Low Interest Rate

All Records Broken When Recent Loan Was Floated

Ottawa.—Breaking all records for low interest rates, a \$30,000,000 issue of Dominion Canada treasury bills has just been sold, it was announced. At the price received the average yield per annum on the bills is 1.237 per cent. The previous low mark was an issue of \$20,000,000 sold to yield 1.28 per cent per annum.

The bills are due November 1 and the discount price of the accepted bids was 96.69. Proceeds will be used to retire in part an issue of \$50,000,000 in bills taken up by the chartered banks some months ago at a yield of 2½ per cent per annum.

## DUCHESS OF YORK GOES ON HER FIRST AEROPLANE RIDE

This picture was taken when the Duke and Duchess of York travelled by aeroplane from London to Brussels, Belgium, to visit the International Exhibition there. Above is a picture of the charming lady, left, looking none the worse for the trip, which was her first flight.

## Flood Damage Heavy

No Transportation Into Slave Lake Area Except By Air

Slave Lake, Alta.—Rampaging Lesser Slave Lake, which for two and one half days has pounded five-foot waves into this flood-stricken town, had left a scene of desolation with residents living in tents on higher ground, small buildings washed away, and others undermined, until they threaten to crumble.

"Lashed by an inshore gale, the waves battered away small buildings, including the post office, and residents are fearful that a new wind will complete nature's onslaught. The lake is already at high level and even in calm weather travel through the town is done by boat. Damage in the flood of the last few days is estimated at \$25,000.

Valuable farm lands on the shores of the lake have been inundated and the valuable top-soil carried away by the waves.

There is no transportation into this area except by air. The highway is still under water for nearly 20 miles, and the Northern Alberta Railway, which put through trains last week after 10 days tieup, again is blocked as a result of new undermining of rails by the waves. The former trouble sections on which repair work was done are holding up, however.

## Russian Sub Sinks

Collided With Surface Vessel And 55 Men Drown

Moscow.—A brief official announcement, laconic as are most such Soviet revelations, disclosed the death of 55 Russian seamen, some of them young cadets, in the sinking of the submarine B-3 in Finland Bay one week ago.

The submarine, participating in the current Baltic fleet manoeuvres, came up from an underwater cruise and collided with an unidentified surface vessel.

A gaping hole was torn in her hull and she sank immediately. All aboard her—officers, seamen and naval school students—perished.

The submarine was of the old "bars" type built in 1917, toward the end of Russia's participation in the Great War. A mass funeral will take place at Kronstadt.

The government will distribute sums of 10,000 rubles to families of the victims. Pensions also will be paid, it was announced.

## Explosion Traps Miners

Heroic Efforts Falt To Rescue Men In Transvaal

Ernesto, Transvaal.—All hope has been abandoned for the rescue of 78 native miners trapped in a gallery following an explosion which killed two white miners on the 300-foot level of the Marfield mine at Estantia, 150 miles from Johannesburg.

Heroic efforts of rescue squads which reached the mine shortly after the explosion were without avail.

## RELIEF SYSTEM IN ONTARIO IS TO BE CHANGED

Toronto.—Drastic reorganization of Ontario's system of unemployment relief to curtail costs and to administer to the municipalities was announced by Premier Mitchell F. Hepburn following a session of the Ontario cabinet.

"These steps are absolutely necessary to maintain the solvency of the government," the premier declared as he revealed his government had established a new basis for the province's contribution to relief costs. Instead of paying a proportion of total relief costs the government will make specified lump sum payments on a per capita basis.

From September 1, in all of the 17 bankrupt municipalities where the government has assumed the full burden of relief, the province's contribution will be payment of a maximum of \$7.50 monthly per capita. The per capita costs in these municipalities under the present system has ranged from \$3.50 to \$13.50 per month.

In all other municipalities exclusive of the unorganized districts of northern Ontario the government's maximum contribution will be \$5 per capita after Sept. 1.

Municipalities will be required to assume full responsibility for relief administration. This reversal of the policy of Hon. David Croll will be accompanied, the premier said, by a drastic shakeup within the welfare department. "Our objective is to reduce the welfare department to a mere shell," the premier said.

"The per capita cost of relief is lower in many of the municipalities which handle their own relief. Our system has been too expensive," he explained.

Under the present system the premier estimated that relief would cost the province about \$36,000,000 a year. By the new plan it is expected that a saving of more than \$750,000 monthly can be effected. There would be an immediate saving of about \$240,000 annually in administrative costs alone, the premier explained.

## Chinese Eat Unripe Grain

Endeavor To Stave Off Starvation Until Help Arrives

The emaciated, ragged survivors Chungsing, Hupeh.—Flood survivors, swarming like locusts on the upland wheat fields of this stricken city, devoured unripe grain to save themselves from starvation.

Relief from Hankow was 300 miles away and coming slowly.

Sometimes in hands 1,000 strong, worked away gradually from Chungsing where the dead seem to lie everywhere, the bodies of men, women and children mingled with those of animals.

The Han river, which brought unprecedented disaster to valley dwellers when it rose 20 feet in a few hours during the night of July 7 was still flooding the territory.

Deprived of food or hope of food, until relief arrives, the starving hordes in the uplands stopped to eat wherever they could find food. They did not plunder or steal. They announced to inhabitants of villages they entered: "We come to eat."

## Report Better Conditions

Kansas City.—Rural middle America is going off relief. By thousands, farm families are becoming self-supporting, aided by better crop conditions, readjustment loans and their own efforts, an Association Press survey showed. Eight states report a relief list at present of less than 50,000 families.

## Qualifies As Pilot

Edmonton.—Believed to be the first woman to qualify as a commercial pilot in Alberta or Saskatchewan, Miss Margaret Fane, 21, has successfully passed her flying tests here, it was announced by Howard C. Ingram, inspector of civil aviation for western Canada.

## MONEY IS ONLY A TOKEN.

All the real things are produced by men out of the ground, and without those things money would have no value whatever, since it would then represent claims to nothing. Even credit will, on analysis, be found to be merely a reflection of what happened under a barter economy.

In those days a farmer with surplus wheat who wished a man to build a house for him would recognise that the man would have to be kept alive while he was building the house. He would, therefore, feed him while he was so engaged. He would have "faith" that the man would ultimately finish and hand over the house and he would accordingly, give him "credit."

Barter being a very cumbrous method of trade for advanced civilisation, a token or money system was introduced which enabled the farmer to exchange his wheat for tokens, and instead of being obliged to give wheat to the house builder, was able to give him tokens with which he could claim wheat and other food, clothes, and anything else he wished; but the essential facts of the transaction remained the same.

Money does not build houses: man does that with things out of the ground. The money handed to him by the buyer of the house is merely a convenient method of giving him, in exchange, food, clothes and other goods and other services, none of which, in their turn are made by money but again by human beings with things out of the ground.

Under the barter system, those who made clothes, cannon and other necessities for the army which fought at Waterloo would have received houses, coaches, horses, etc., in return, and there would have been an end to the matter. It is, however, a curious commentary upon the monetary system that it is possible for the nation still to owe the original money value of those cannon, etc., and to have paid for over 120 years, interest for services rendered by those long since dead.

Goods would still have value if there were no money, but money would have no value if there were no goods.

## STONY PLAIN SUN.

Published Every Thursday at The Sun Office, Stony Plain.

Thursday, August 8, 1935.

### Advertising Rates:

Display, 40 cents per column inch plate, 25¢ per column inch. Readers in Locals, 15¢ line. Legal and Municipal Notices, etc., 15¢ line first insertion; 10¢ line each subsequent insertion.

Apply MRS. WALES,  
The Old John B. Miller House, 2nd Street, Stony Plain.

## THE NEWS OF STONY PLAIN AND DISTRICT.

The Gosset motor party left on Saturday for Jasper. The Huston motorists left the same afternoon for the climb to Jasper Park.

Rev H. Kuring, pastor of Blueberry church, is attending a Missouri Lutheran conference at Ledue, which closes on the 11th.

Jack Messenger, Entwistle; Magnus Larson and Albert Becker, Edmonton, all former residents, were in Stony on Monday.

Dr. Brown, the well-known dentist, left this week on a motor trip to the Coast, and will travel down the highway to Mexico, on a visit. He expects to return thru Colorado, and to travel up the Grand Canyon.

The posters are out for the big auction sale at the Christie residence, Main St. There is a very large offering of furniture and miscellaneous articles. The day and time is 1:30 p.m. Sat. August 17.

The dairy farm of Harmel Bros., Stony Plain, was visited last week by a representative of the Dept. of Agriculture, Dr. Cowan. All the cows were tested for TB, and all were pronounced OK.

Members of the Sports Day association met on Monday evening, with President Geo. Oppertshauer in the chair. All the business in connection with the Dominion day celebration was cleaned up, and a very satisfactory balance was shown.

Get your magazines and Sunday papers at the Hayes's Drug Store, Main St., opp. The Sun Office.

BUTTER AND EGGS WANTED at The Royal Cafe.

## UNITED GRAIN GROWERS LIMITED

A Dividend at the rate of four per cent has been declared on the paid up capital stock of United Grain Growers Limited, for the financial year ending July 31st, 1935.

Cheques will be mailed on September 1st, 1935, to shareholders of record at the close of business, July 31st.

By order of the Board of Directors.

R. S. LAW,  
President,  
Winnipeg, Manitoba,  
July 22nd, 1935.

## BRIAR PIPES

JUST RECEIVED  
AT THE  
ROYAL CAFE,  
TO BE SOLD AT  
25 CENTS.

## Pelco's CAPS

are made for those men and young men who appreciate the little touch of refinement in head dress.

The most comfortable and most serviceable caps made for golf, motorcycling and all outing occasions, as well as street wear.

For Sale at Hardwick's

## SPORTING NOTES OF LOCAL INTEREST

Sand Hills' ball team invaded Stony one evening last week, and engaged in play with the localities. Johnny Beiderwieden was in the box for Stony, with Otto Driziza as catcher. Stony team won by a wide margin. Alvin Wilie ump'd. The visitors should have made a better showing, as they had that nifty s.s. Hy Brox from the Grove, on their team.

Thursday's rain deterred the local athletes from making the trip to Onoway, which had a sports day billed on that date.

Local ball players would like to hear of the date of the postponed sports day up at Wildwood.

Stony's ball team was all set this week to make a catch down to Ryley, where a 3 day ball tournament was to be held, with \$200 for the winners of first prize.

A double header baseball game is billed for Sunday next on the local diamond. Walter League will tangle with the team from Hansens.

There will be a Basketball tournament at Keep Hills on Friday, Aug. 9. Teams competing are: S.P.H., Mewasin, Gennessee, S.P.W.L., Brightbank, Keep Hills and Central baseballers will play a doubleheader.

"The Unknown Port", Etc.

### CHAPTER XII.

It was after Mark Adam had continued on his way, fortified by a substantial dinner and armed with a pumpkin pie and Aurora's "compiments" for Jack, that Nancy came to a glass of warm milk into Cousin Columbine's bedroom, and asked if there were anything she could do for the invalid.

"You can sit down and let me look at it," responded the old lady. "I've got the upper hand of the cold now, and am staying here only because I believe in 'safety first.' Every hour wasted by sickness makes me impatient. There's so much to do in this wonderful old world; and when you're over seventy there's such a little time to it. In Aurora tells me Jack's getting on all right—not that I expected anything else. He's got the Nelson grip, and there's no chance that he'll be imposed on at the Adam ranch. Eve would see to that even if John Adam wasn't the kindest soul alive. Some thought they were too easy going when the boys were youngsters, but—look at the four of 'em!"

"Well, you'll see them all in good time, unless you get desperate and run away from me. I love Pine Ridge even in a blizzard; but I can see how it looks like the end of nowhere to a girl brought up as you've been. I was glad Mark Adam happened in at dinner time to keep you company. Has Aurora Tubbs been talking you to death?"

Nancy laughed.

"Not quite. I let her rattle on and killed time listening."

"Killed time!" echoed Cousin Columbine. "Don't ever use that phrase again, child. Life's too short at the best, even a day like this there are things to do. Everything's made too easy for people now-days. That's half the trouble with 'em. I am younger than you, my dear, when Father took me to Leadville. More than fifty years ago, yet I can shut my eyes and it seems like yesterday."

"Was it much of a place at that time?" questioned Nancy as Cousin Columbine sipped her milk.

"Much of a place! I wish I could make you see it. An entire forest had come down to make room for the town, Nancy; and new-hacked stumps of spruces were still standing in the streets—if they could be called streets. The houses were nothing but shanties or hastily made log cabins. Our own was of logs with a stove pipe for a chimney. The fam-

ily next us used old flower pots for the purpose. Some of the shacks had only canvas for roofs; and others—if you'll believe me!—no roofs at all. There were even shanties half buried in the earth, while some set up on poles. Poles were living in tents and wigwags, too—and now we shiver at a cold entry! Yes, life's too soft."

Nancy laughed as she hitched her chair nearer to the stove, and questioned: "Were there any shops, or did you get provisions from a distance?"

"There were stores of a sort, even at that time. I clearly remember the street where business was carried on. There were always groups of excited miners, with eager, sometimes desperate faces, standing in the middle of it, arguing and gesticulating—men of all sorts and kinds, my dear, the good and the vicious with one thing in common: the lure of silver. Gambling houses were open all night, and so were theatres."

"That!" gasped Nancy. "In a place like that?"

Cousin Columbine nodded.

"Not at the very first, of course; but less than a year after the boom started, saw mills got to work, and dwelling places grew more comfortable. Banks, and business blocks, and dance halls sprang up almost overnight; other places, too, which the town would have been happier without: saloons and gambling houses where many a hard-won fortune was thrown away."

"It doesn't sound like a very restful spot!" smiled Nancy.

"Cousin Nelson laid down her empty glass and pulled the blankets a bit higher.

"A mining town in boom time," she asserted, "is about as restful as a horse's nest that has been disturbed. Along in the early nineties when there was a stampede to San Juan county and the town of Creede was founded, I saw two lines in a newspaper that I never forgot:

"It was day all day in the daytime. And there was no night in Creede."

"And it was the same at Leadville. Bedlam broke loose, after the men stopped work, and it was almost impossible to sleep till daylight."

"Was that the last of the gold and silver rushes, Cousin Columbine?"

"Creede came later than Leadville, as I said; then Cripple Creek, not to mention the Pemperton hoax, my dear. Some day I'll tell you about that, but I mustn't bore you with too many tales at once. We grow glib as we grow old, I fear; and it's years since I've talked over those times with any one."

"But I'm not bored," Nancy assured her. "You'll have to tell this old over again when Jack is here. I wouldn't have him miss it for the world. Do you suppose we could see one of those mining towns some day?"

"No reason in the world why you can't. Come spring we'll make an excursion to Cripple Creek. Even now it will give you an idea of how a mining town is built; and no doubt Mark Adam would jump at the chance to drive us over. Did he say how Luke was getting on?"

"He'll be home soon on crutches. Does Luke look like his brothers, Cousin Columbine?"

"Not in the least. He's the odd member of the family and resembles no one. Luke was a timid little boy and not quite so husky as the others. He's taking a year off before entering college."

"Aurora says he's his mother's favorite."

"Stuff and nonsense! If she felt any favoritism Eve Adam has too much sense to show it; but Luke's affectionate, and not ashamed to let folks find it out. I've thought at times that Eve had a leaning toward Matthew; but if that's true it's only because he's so shy she wants to protect him."

"How old is John?"

"Sixteen. Living with friends at the Springs and going to high school. He's headed for college in the East. He and Mark are as alike as two peas in looks; but John's more quiet and studious like his father. Mark's the liveliest member of the family, but Eve has a right to be proud of him even if he has only a high school diploma in place of Matt's A.B. He still hopes to study forestry when his father can spare him. Put

a stick of wood in that stove, Nancy, and then I'll try to get a nap."

As Nancy obeyed she glanced at the bedside table on which lay a copy of the Atlantic Monthly almost a year old. This reminded her of Pine Ridge's lack of reading matter, and she asked: "How does it happen that there's no library here, Cousin Columbine? It's a pretty small place, but doesn't anybody like to read?"

It was moment before the old lady responded; then she said: "I suppose most of the folks 'round here are—well, they haven't a great deal of education, and no background whatever. The Adams, and Theodore Taylor, our postmaster, are the exceptions. The truth is, Nancy, any youngsters with ambition usually leave town, which is not to the advantage of Pine Ridge as a community. Then too, every one has work to do, and reading's regarded as a luxury. That's wrong, of course; but being a pioneer I can understand it."

"But they have time to loaf around the store!" observed Nancy shrewdly. "And if they could get good books just by going to a library, perhaps they'd stop buying those awful magazines Juanita feeds on."

"Maybe they would," admitted Cousin Columbine, "but public libraries don't grow on bushes; and in a place like this there's no Aladdin to rub his wonderful lamp and wish for one!"

Nancy laughed as she went out, leaving Cousin Columbine to her nap. Aladdin! What would she do to Pine Ridge if she possessed his lamp? This idea, and the inspiration which was born of it an hour later, so absorbed the girl that any necessity for "killing time" was quite forgotten.

"What you've been doing! This long afternoon!" questioned Aurora, poking her head into the tower room without ceremony. "Supper's been ready for ten minutes; but everything's so still 'round here I thought maybe you was sound asleep."

Nancy glanced up from the lengthy and momentous letter she was writing to her Aunt Louise.

"You're right, Aurora. I think I've been asleep most of my life, but I'm waking up, thank goodness! Did you ever hear about Aladdin and his wonderful lamp?"

### CHAPTER XII.

Nancy's letter to her Aunt Louise arrived on a Saturday, and she carried it out to Edgemoor to read aloud. The young people had been gone more than a month, and as the strangeness of their absence wore away, life was settling down into its new routine, and Phil declared he never wanted to go back to the city.

There were times when his mother agreed with him. Despite financial worry, Margaret Nelson was conscious of a sense of restfulness which had been lost to her during the last few years. Fond as she was of her husband's sister, Louise's almost daily comments on the children often annoyed her; but now the week-end visit was something to look forward to.

To-day she arrived on the train with her brother, and said before she had taken off her hat:

"I've a letter from Nancy. It's rather surprising on the whole. Shall I read it now?"

"Let's wait till I get supper on the table," suggested Margaret, with a glance at her husband's tired face.

"Phil says he's famished, and no

wonder! He's dug out every path since four o'clock. I don't know what I'd do without that boy, here in the country. He's a real worker."

"And in town there were no chores to occupy him," observed his aunt. "This move has been a splendid thing for Phil, Margaret. He looks and acts like a different boy. And I'm not sure but that the visit to Colorado has done something for Nancy, even if I did oppose it. Just wait till I drop my things and I'll help with supper. Those beans smell the way Boston baked beans ought to smell! I'll be down in a moment."

Watching his sister run lightly up the stairs, James Nelson wondered if the change in environment hadn't benefited her as well as Phil. Possibly Louise appreciated this taste of family life the better, because of her absence during the week. As she disappeared, he bent to kiss his wife for the second time since his arrival. It was Margaret comprehended, an effort on his part to make up for the lack of cheering news, and tactfully refrained from asking how the day had gone.

"This is wonderful brown bread," declared Louise when they assembled at supper. "In our days of affluence, Margaret, I'd completely forgotten that you could cook! I'll take two bites and then read the letter. Have you heard from Colorado since today?"

"A note from Jack. He says—"

"It was addressed to me," broke in Phil impatiently. "He'd learned to milk; and is riding horseback every day. He says those Adam people are awfully nice, and that Mr. Adam does a lot of cooking because his wife doesn't like to do it and he does. He hadn't seen Nancy for more than a week, but one of the Adam boys was there to dinner—at Cousin Columbine's, I mean; and there's been a blizzard, and Cousin Columbine and Nancy are going to eat Christmas dinner at the ranch 'cause they can't spare Jack; and Mr. Adam's going to cook the turkey all himself. I wish I could go to Colorado and get a job. Just feel my mind's been obliged; and having satisfied her first hunger, opened the letter from Pine Ridge.

"Read it all," said Dad. "We haven't heard for several days."

"No doubt Nancy counted on my bringing this out to-night. It should have reached me sooner. Those storms in the middle west delayed it, and she's in a hurry for an answer too. She says:

(To Be Continued)

### Little Helps For This Week

Who hath despised the day of small things? Zechariah 4:10.

Little things on little wings Bear little souls to heaven.

An occasional effort even of an ordinary humbleness may accomplish great acts of sacrifice, or bear severe pressure of unwanted trial. But constant discipline in unnoticed ways, and the spirit's silent unselfishness becoming the hidden habit of life, give to it its saintly beauty, and this is the result of care and lowly love in little things. Perfection is attained more readily by this constancy of religious faithfulness in all minor details of life, consecrating the daily efforts of self-forgetting love.

Love's secret is to be always doing things for God, and not to mind because they are such very little ones.

### Some Old Bank Notes

Found in Ancient Records And Dated 1770 And 1776

Two samples of paper currency, issued by British Colonies in America before they became American States, have just come to light at Cincinnati, Ohio. They are a Maryland note for six dollars, entitling the holder to receive "Bills of exchange payable in London with gold or silver, at the rate of four shillings and sixpence for each dollar," dated 1770, and a New Jersey bill, issued in 1776, for twelve shillings. Both bear the warning: "To counterfeit is death." The bills were found in a bundle of old records in the Cincinnati Board of Education Library. How they got there is a mystery, since at the time they were issued Cincinnati was not even a trading station, and few white men had penetrated into that part of the Red Indians' territory.

For the funeral pyre of a Buddhist priest in Burma recently, an enormous white elephant was made of paper and bamboo, and the coffin raised to the canopied seat on the elephant's back for burning.

### NATURE'S MINERAL SALTS

Cleanse the system—purify the blood. Nothing better for indigestion, constipation, headache, rheumatism, kidney and liver. At all Druggists—Saskal.

## In Yodlerville.

New Resident—Does this village boast of a choral society?  
Villager—I can't say that we boast of it; we just suffer in silence like.

## Where Haggis Comes From.

"Why do you never see bagpipes in a pawn shop?" asks a paragrapher. Most likely because, answers an exchange, that when a bagpipe is of no further use as a musical instrument the thrifty owner fills it with onions and oatmeal, boils it, and calls it haggis.

## Edmonton Normal to Open.

When the Normal School in Edmonton re-opens in Edmonton Dr. G. S. Lord will resume his duties as principal. Other staff members who will resume their duties are Dr. J. R. Tuck, Dr. D. J. Dickie, R. W. Hadley, G. M. Dunlop.

Only candidates for first class standing will be given training at Edmonton Normal, while the number will be limited to the Edmonton area.

## Spruce Grove News.

Mr. and Mrs. Herman Duoholke have arrived back from a ten day visit with friends at Strawberry Creek.

Miss C. Kuhl and Miss Little have been engaged to teach at the Grove Public school for the coming term.

Mr. H. Brok is now back at farming, having relinquished his truck-driving job.

Quite a number in the district are recovering from what is described as "severe colds." Among those who were under treatment were O. Schlang, of the Gillespie elevator, and C. Brox.

There was a good attendance at the Social Credit meeting held in the local schoolhouse last week.

Mr. Morrison, the well-known telegrapher, is now in charge of the C.N.R. station, in the absence of Mr. J. Elder, who is on a trip to Banff.

Last Sunday's Canadian Germ-

an re union and picnic in Edmonton drew a large number of celebrants from the Spruce Grove district.

## The Defective Radio.

A venerable old Scot purchased a little radio set, and a few days later a friend asked him how he liked it.

"Weel," he replied, "it's aw richt to listen to; but the bulbs are nae so guid to read by."

## C. N. Train Service.

The train No. 190 leaves Jasper for Edmonton Monday, Thurs. Sat. arrives Stony Plain 4:51 a.m.

Train No. 189 leaves Edmonton 9:30 p.m. Tues. Thurs. Sat. and arrive Stony Plain 10:57 p.m.

## CANDIDATE BRYAN TO HOLD A MEETING SAT.

It is doubtful if Mr. Houson will be able to speak in Stony Plain during the present political campaign. The condition of his throat has forced him to get other speakers to take his place at many meetings. As he has spoken

**GEORGE J. BRYAN,**  
The Liberal Candidate.

in Stony Plain a number of times before, he is saving his voice for places which have never heard him. Everyone is requested to listen to his radio broadcasts. Captain J. C. Bowen, ex-M.L.A., and J. C. Marshall, one of the Edmonton Liberal candidates, will be at Mr. Bryan's meeting on Saturday night.

## Mark Ballots 1 2 3.

When voters in the rural districts of Alberta go to the polls on Thursday, August 22 they will vote by the Preferential or transferable ballot. The old-time way of voting by marking "X" will be ruled out, and ballots are to be marked with first, second and successive choices, using ordinary figures.

The rural voter under the system now in vogue in Alberta uses the Preferential or transferable ballot in the election of one member. He marks "1" for his first choice, that is, for the man he would most wish see elected of all candidates.

If only two are running the voter need go no further, because he has but one choice; but if more than two are running, then by marking "2" for some other candidate he indicates that if his first choice is eliminated because he is low man, then the voter wants his vote counted for his second choice, and so on for his other choices.

## United Grain Growers Declare Dividend.

A dividend at the rate of four per cent, or one dollar per share, has been declared by the Directors of United Grain Growers, Limited, for the financial year ending July 31st, 1935. Cheques will be mailed on September 1st, 1935, to shareholders of record at the close of business, July 31st.
